

MOBILE APP

Shopswift

Application Overview

01

Includes detailed product info, reviews, "Buy Now" and "Notify When Available" options, multiple shipping methods, return policy, size guide, store pickup, and an upcoming product gallery.

02

Offers quick search, recent searches, predictive suggestions, filters (size, color, brand, price), sorting options, and a "Product Not Found" message.

03

Allows users to manage profile details, select Normal or Pro versions, update information, set notification preferences, manage addresses, choose languages, and track wallet transactions.

02

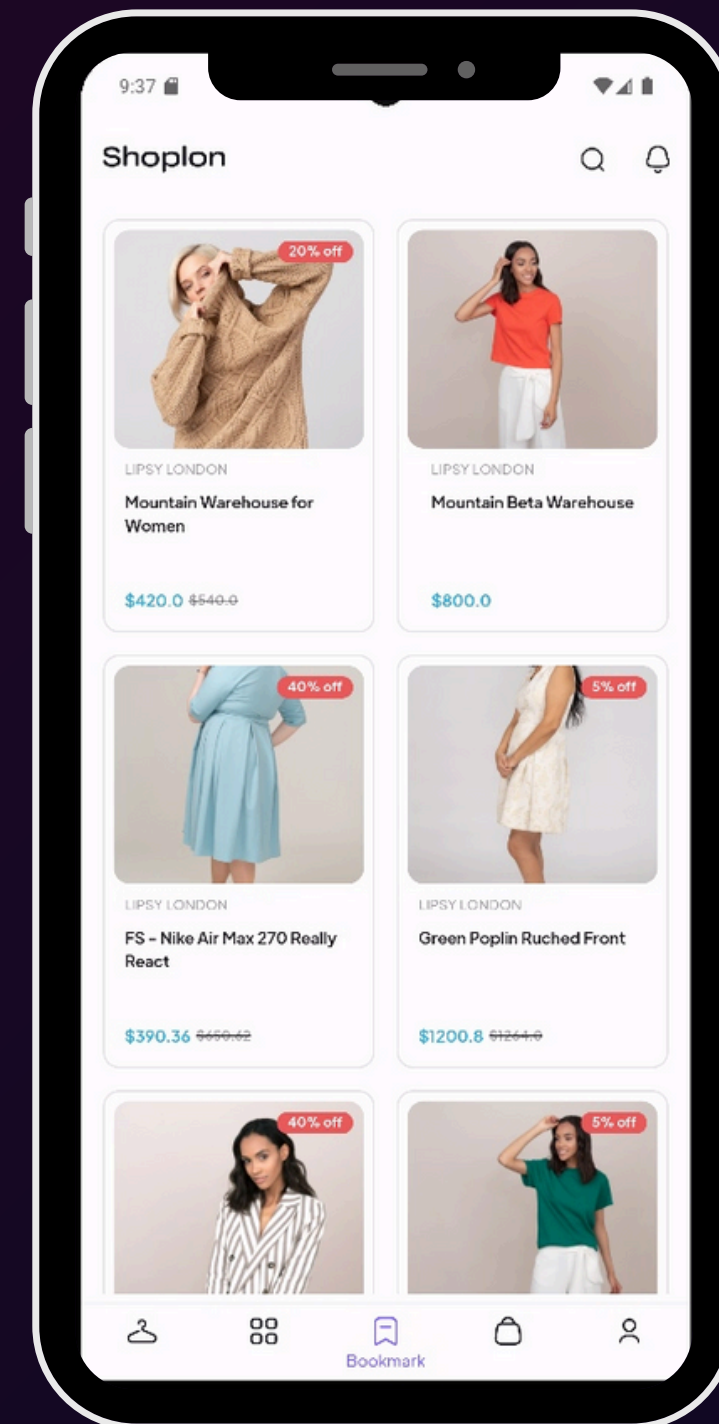

Features a home page, sales page, kids' products, brand and category pages, and three product presentation styles, with two launching soon. Users can bookmark items.

04

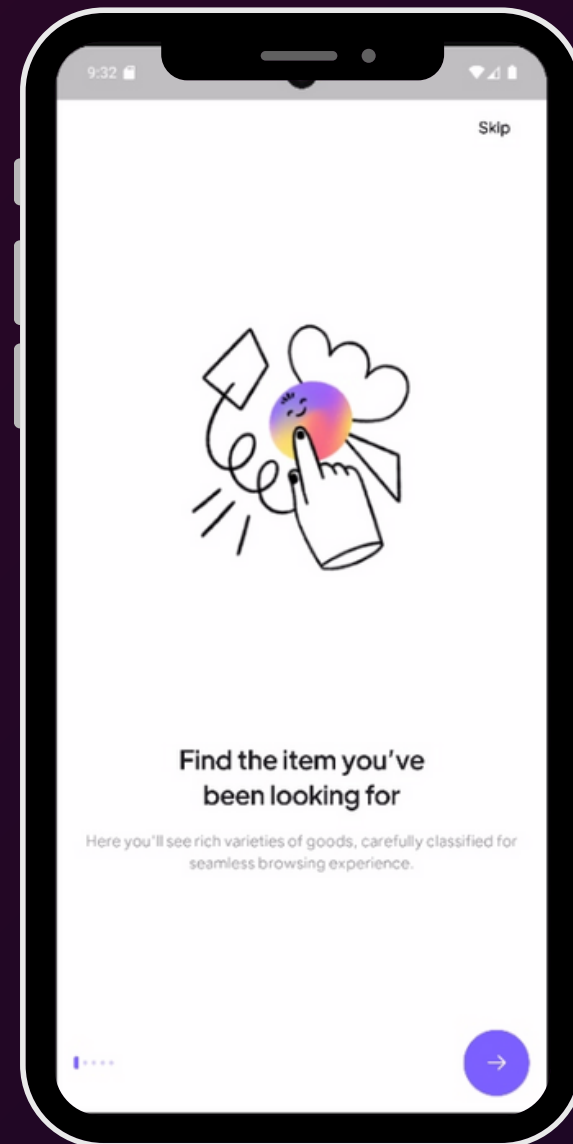

Enables cart management, address selection, order review, and payment options (card, cash, or credit).

06

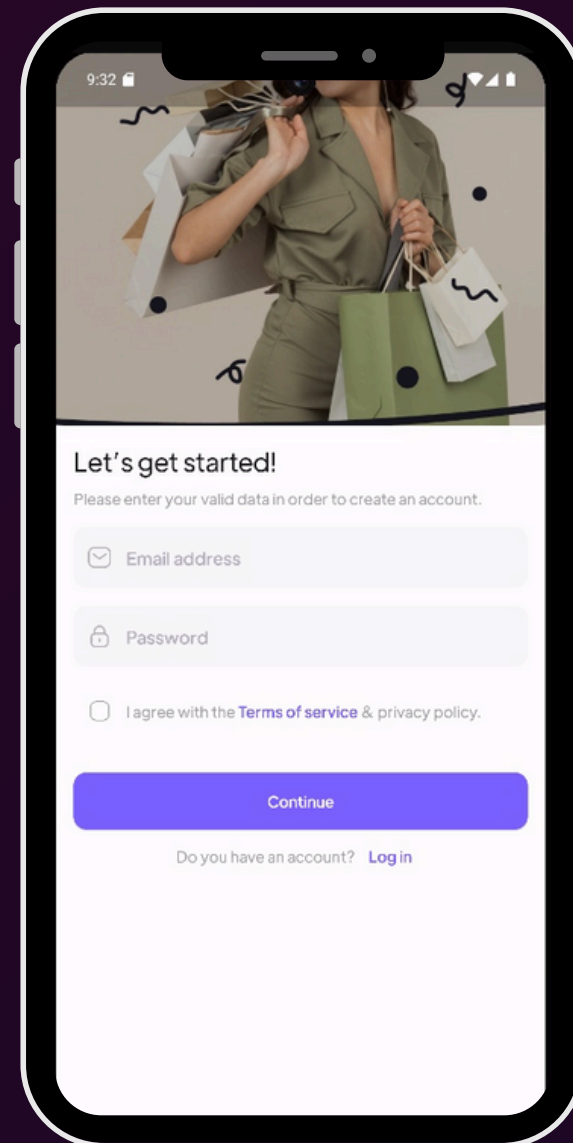

Provides help and chat, user preferences, and order management for tracking, processing, canceling, or delivering orders.

Application Features

01

The Shopswift home page is a dynamic landing space featuring top deals, trending products, and personalized recommendations for a seamless shopping experience.

02

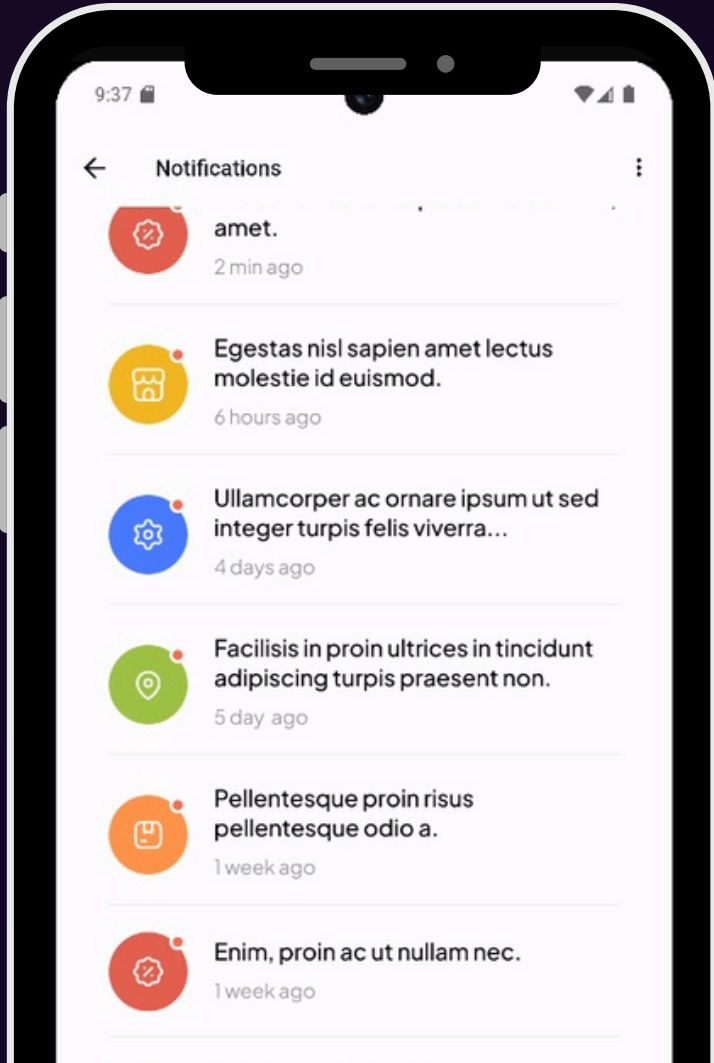

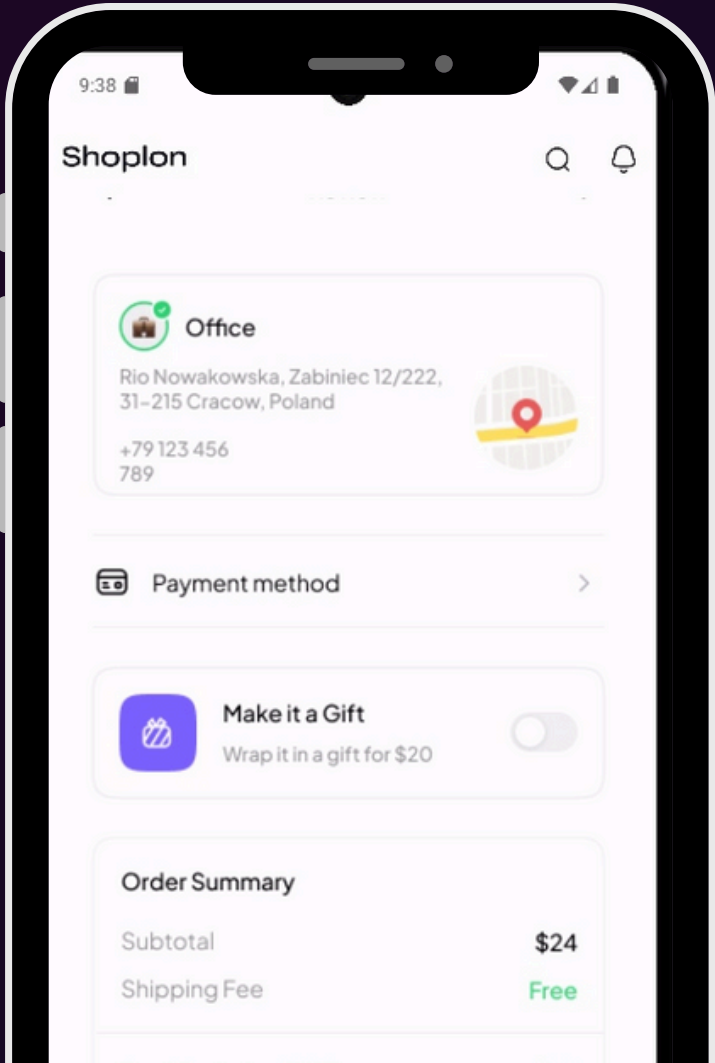

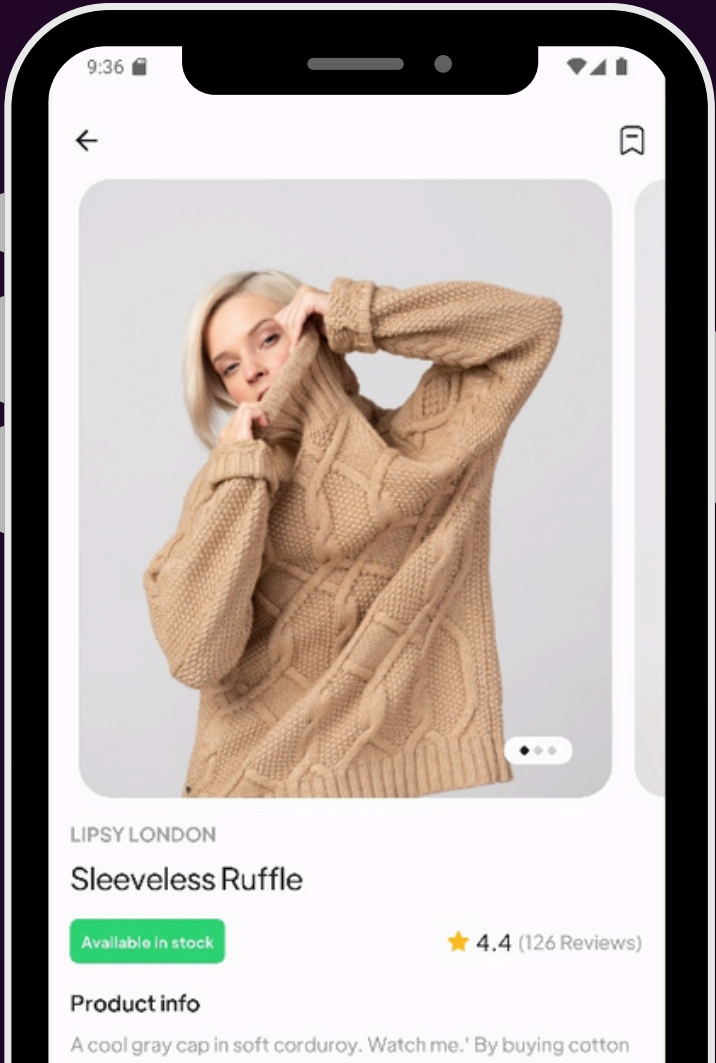

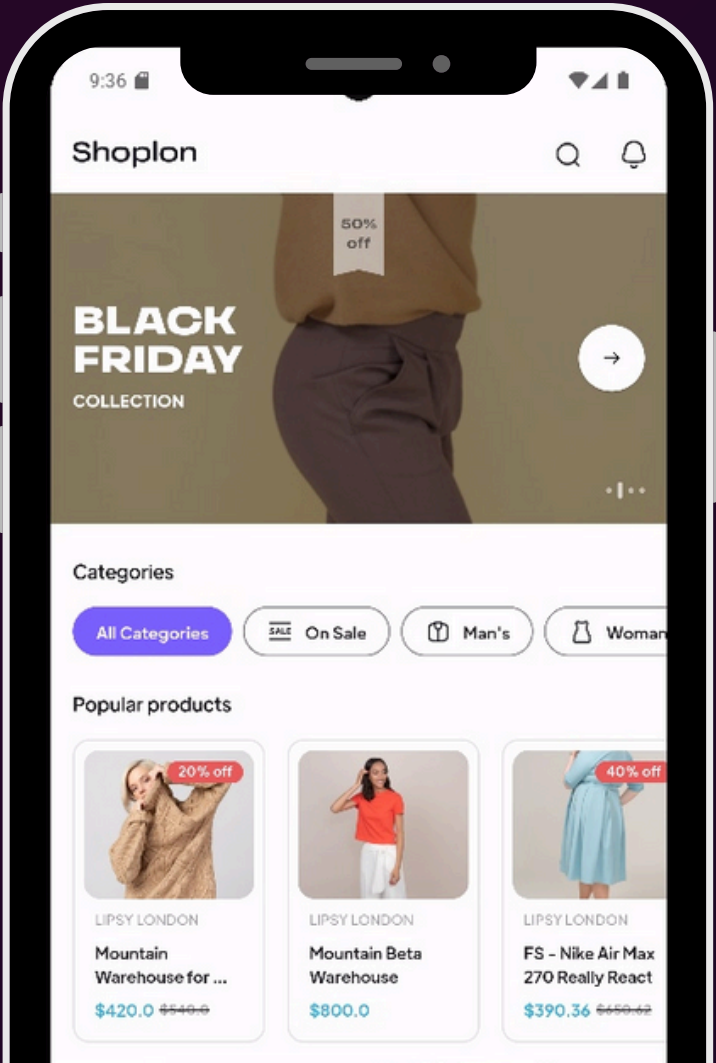

The Shopswift product detail page offers comprehensive information, including images, descriptions, reviews, and purchasing options for an informed and convenient shopping experience.

03

The Shopswift order receiving detail page provides users with a clear summary of their order status, tracking information, and expected delivery date for easy order management.

04

The Shopswift notification page centralizes alerts and updates, including order status changes, promotions, and personalized recommendations, keeping users informed in real time.

Thank You
